Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**.

That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name : BNP Paribas Funds Global Inflation-Linked Bond

Legal Entity Identifier: 549300S7589QFX0MGS37

ENVIRONMENTAL AND/OR SOCIAL CHARACTERISTICS

Did this financial product have a sustainable investment objective?

☐ Yes	☒ No
☐ It made a **sustainable investment with an environmental objective**: ___%	☐ It promoted **Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it had a proportion of 0.0% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective** : ___%	☒ It promoted E/S characteristics but **did not make any sustainable investments**

All actual data within this periodic report are calculated on the closing date of the accounting year.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promotes environmental and social characteristics by assessing underlying investments against Environmental, Social, and Governance (ESG) criteria using an ESG internal proprietary methodology, and by investing in issuers that demonstrate good environmental, social and governance practices.

Sovereign issuers and agencies

The investment strategy selects sovereign issuers based on their performance across the environmental, social and governance pillars. The ESG performance of each country is assessed using an internal Sovereign ESG methodology that focuses on measuring governments' efforts to produce and preserve assets, goods, and services with high ESG values, according to their level of economic development. This involves evaluation of a country against a combination of environmental, social and governance factors, which include but not limited to:

- Environmental: climate mitigation, biodiversity, energy efficiency, land resources, pollution
- Social: life conditions, economic inequality, education, employment, health infrastructure, human capital
- Governance: business rights, corruption, democratic life, political stability, security

BNP Paribas Asset Management's Global Sustainability Strategy places a strong emphasis on combatting climate change. Therefore, given the importance of sovereigns in addressing climate change, the internal Sovereign ESG methodology includes an additional scoring component that captures the country's contribution to progress towards the net-zero goals set out in the Paris Agreement. This additional scoring component reflects countries' commitment to future targets balanced by their current policies and their forward-looking physical climate risk exposure. It combines temperature alignment methodology for determining national contributions to climate change with an assessment of the laws and policies countries have in place for addressing climate change.

The investment manager also applies the BNP Paribas Group's sensitive countries framework, which includes restrictive measures on certain countries and/or activities that are considered as being particularly exposed to money laundering and terrorism financing related risks.

Corporate issuers

The investment strategy selects corporate issuers with good or improving ESG practices within their sector of activity. The ESG performance of an issuer is evaluated against a combination of environmental, social and governance factors which include but are not limited to:

- Environmental: energy efficiency, reduction of emissions of greenhouse gases (GHG), treatment of waste
- Social: respect of human rights and workers' rights, human resources management (workers' health and safety, diversity)
- Governance: Board of Directors independence, managers' remuneration, respect of minority shareholders rights

The exclusion criteria are applied with regard to issuers that are in violation of international norms and convention, or operate in sensitive sectors as defined by the Responsible Business Conduct Policy (RBC Policy).

Furthermore, the investment manager promotes better environmental and social outcomes through engagement with issuers and the exercise of voting rights according to the Stewardship policy, where applicable.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the financial product.

How did the sustainability indicators perform?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The following sustainability indicators are used to measure the attainment of the environmental and social characteristics promoted by the financial product:

- The percentage of the financial product's portfolio compliant with the BNP Paribas Group's controversial countries framework and BNP Paribas Asset Management RBC Policy: 100%

- The percentage of the financial product's portfolio covered by ESG analysis based on the ESG internal proprietary methodology: 100%

- The weighted average ESG score of the financial product's portfolio compared to the weighted average ESG score of its investment universe: 55.2 vs 54.78 (Bloomber Universal Government Inflation-Linked Bond Eur Hedged)

...and compared to previous periods ?

Not applicable for the first periodic report.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The financial product does not intend to make any sustainable investment.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The financial product does not intend to make any sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a 'do not significant harm' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors ?

The product considers principal adverse impacts on sustainability factors by systematically implementing the sustainable investment pillars defined in the GSS into its investment process. These pillars are covered by firm-wide policies that set criteria to identify, consider and prioritise as well as address or mitigate adverse sustainability impacts caused by issuers.

The RBC policy establishes a common framework across investments and economic activities that help identify industries and behaviours presenting a high risk of adverse impacts in violation of international norms. As part of the RBC Policy, sector policies provide a tailored approach to identify and prioritize principal adverse impacts based on the nature of the economic activity, and in many cases, the geography in which these economic activities take place.

The ESG Integration Guidelines includes a series of commitments, which are material to consideration of principal adverse sustainability impacts, and guides the internal ESG integration process. The proprietary ESG scoring framework includes an assessment of a number of adverse sustainability impacts caused by companies in which we invest. Outcome of this assessment may impact the valuation models as well as the portfolio construction depending on the severity and materiality of adverse impacts identified.

Thus, the Investment Manager considers principal adverse sustainability impacts throughout the investment process through the use of the internal ESG scores and construction of the portfolio with an improved ESG profile compared to its investment universe.

The Forward-looking perspective defines a set of objectives and developed performance indicators to measure how the researches, portfolios and commitments are aligned on three issues, the '3Es' (Energy transition, Environmental sustainability, Equality & inclusive growth) and thus support investment processes.

Furthermore, the Stewardship team regularly identifies adverse impacts through ongoing research, collaboration with other long-term investors, and dialogue with NGOs and other experts.

Actions to address or mitigate principal adverse sustainability impacts depend on the severity and materiality of these impacts. These actions are guided by the RBC Policy, ESG Integration Guidelines, and Engagement and Voting Policy which include the following provisions :

- Exclusion of issuers that are in violation of international norms and conventions and issuers that are involved in activities presenting an unacceptable risk to society and/or the environment

- Engagement with issuers with the aim of encouraging them to improve their environmental, social and governance practices and, thus, mitigate potential adverse impacts

- In case of equity holdings, voting at Annual General Meetings of companies the portfolio is invested in to promote good governance and advance environmental and social issues - Ensuring all securities included in the portfolio have supportive ESG research

- Managing portfolios so that their aggregate ESG score is better than the relevant benchmark or universe

Based on the above approach, and depending on the composition of the financial product's portfolio (i.e. the type of issuer), the financial product considers and addresses or mitigates the following principal adverse sustainability impacts:

Corporate mandatory indicators:
1. GreenHouse Gas (GHG) Emissions
2. Carbon footprint
3. GHG intensity of investee companies
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector
7. Activities negatively affecting biodiversity sensitive areas
8. Emissions to water
9. Hazardous waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Corporate voluntary indicators:
Environment
4. Investments in companies without carbon emission reduction initiatives
Social
4. Lack of a supplier code of conduct
9. Lack of a human rights policy

Sovereign mandatory indicator:
15. GHG intensity
16. Investee countries subject to social violations

More detailed information on the manner in which principal adverse impacts on sustainability factors are considered can be found in the BNP PARIBAS ASSET MANAGEMENT SFDR disclosure statement: https://docfinder.bnpparibas-am.com/api/files/874ADAE2-3EE7-4AD4-B0ED-84FC06E090BF

What were the top investments of this financial product?

The list includes investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 30.12.2022

Largest investments	Sector	% Assets*	Country
UNITED STATES TREASURY 0.13 PCT 15-OCT-2026	Government	7.50%	United States
UNITED STATES TREASURY 0.63 PCT 15-JUL-2032	Government	6.62%	United States
UNITED KINGDOM (GOVERNMENT OF) 1.25 PCT 22-NOV-2027	Government	5.31%	United Kingdom
UNITED STATES TREASURY 0.75 PCT 15-JUL-2028	Government	4.87%	United States
UNITED STATES TREASURY 0.13 PCT 15-OCT-2025	Government	3.62%	United States

The largest investments are based on official accounting data and are based on the transaction date.
* Any percentage differences with the financial statement portfolios result from a rounding difference

What was the proportion of sustainability-related investments?

What was the asset allocation ?

Asset allocation describes the share of investments in specific assets

The investments used to meet the environmental or social characteristics promoted by the financial product, taking into account all the binding elements of its investment strategy as mentioned above, represent the proportion of assets with a positive ESG score combined with a positive E score or a positive S score and the proportion of assets being qualified as Sustainable Investment, both based on the BNPP AM ESG proprietary methodologies.

The proportion of such investments used to meet the environmental or social characteristics promoted by the financial product is 93.0%.

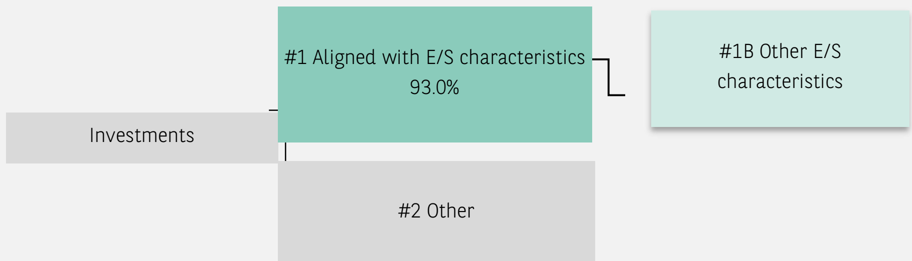
The proportion of sustainable investments of the financial product is 0.0%.

The remaining proportion of the investments may include :

- The proportion of assets that do not attain the minimum standard to meet environmental or social characteristics promoted by the financial product, being the proportion of assets with a positive ESG score combined with a positive E score or a positive S score and the proportion of assets being qualified as Sustainable Investment, both based on the BNPP AM ESG proprietary methodologies. These assets are used for investment purposes, or
- Instruments which are mainly used for liquidity, efficient portfolio management, and/or hedging purposes, notably cash, deposits and derivatives.

In any case, the investment manager will ensure that those investments are made while maintaining the improvement of the ESG profile of the financial product. In addition, those investments are made in compliance with our internal processes, including the following minimum environmental or social safeguards :

- The risk management policy. The risk management policy comprises procedures as are necessary to enable the management company to assess for each financial product it manages the exposure of that product to market, liquidity, sustainability and counterparty risks. And
- The RBC policy, where applicable, through the exclusion of companies involved in controversies due to poor practices related to human and labour rights, environment, and corruption, as well as companies operating in sensitive sectors (tobacco, coal, controversial weapons, asbestos,...), as these companies are deemed to be in violation of international norms, or to cause unacceptable harm to society and/or the environment



#1 Aligned with E/S characteristics includes investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

The sub-category **#1B Other E/S characteristics** covers covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A portfolio security classified as sustainable investment may, taking into account all its activities, both contribute to a social objective and to an environmental objective (aligned or not with the taxonomy of the EU) and the figures shown take this into account. However, the same issuer can only be recognised once for sustainable investments (#1A Sustainable).

In which economic sectors were the investments made ?

Sectors	% Asset
Government	98.76%
Forex contracts	3.55%
Derivatives	-0.11%
Cash	-2.29%

Source of data: BNP Paribas Asset Management, as at 30.12.2022
The largest investments are based on official accounting data and are based on the transaction date.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The financial product did not commit to having a minimum proportion of sustainable investments with an environmental objective in economic activities that are considered environmentally sustainable within the meaning of the EU Taxonomy, and it did not do so.

Did the financial product invest in fossil gas and/or nuclear energy activities that comply with the EU Taxonomy [1]?

☐ Yes:

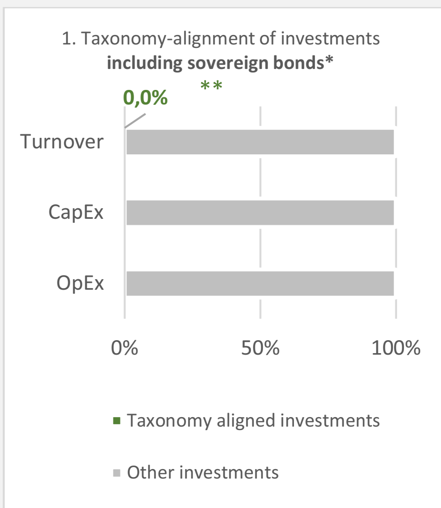
☐ In fossil gas ☐ In nuclear energy

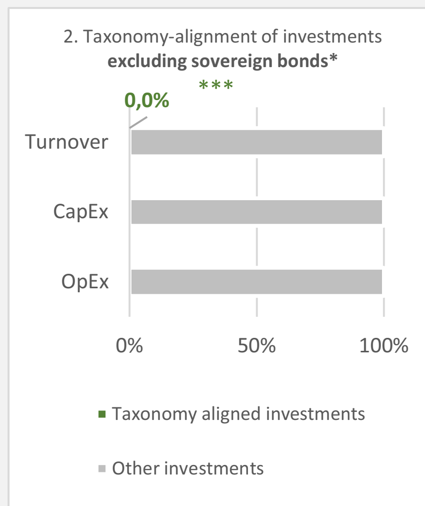
☒ No:

At the date of closure of the accounting year and preparation of the annual report, the data are not available and the management company does not have the information relating to the previous year.

Taxonomy-aligned activities are expressed as a share of: :
- **turnover** reflecting the"greenness" of investee compagines.
- **capital expenditure** (CapEx) showing the green investments made by investee companies relevant for a transition to a green economy
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*





* *For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

***Real taxonomy aligned*

****Real taxonomy aligned. At the date of preparation of this periodic information document, the management company does not have all the necessary data to determine the alignment of investments with the taxonomy, excluding sovereign bonds. The percentage of alignment of investments with the taxonomy, including sovereign bonds being by construction a real minimum proportion is taken up accordingly.*

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of investments made in transitional and enabling activities?

The share of investments in transitional and enabling activities within the meaning of the Regulations Taxonomy is 0% for transitional activities and 0% for enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

Not applicable for the first periodic report.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under ' other', what was their purpose and were there any minimum environmental or social safeguards?

The remaining proportion of the investments may include :

- The proportion of assets that do not attain the minimum standard to meet environmental or social characteristics promoted by the financial product, being the proportion of assets with a positive ESG score combined with a positive E score or a positive S score and the proportion of assets being qualified as Sustainable Investment, both based on the BNPP AM ESG proprietary methodologies. These assets are used for investment purposes, or

- Instruments which are mainly used for liquidity, efficient portfolio management, and/or hedging purposes, notably cash, deposits and derivatives

In any case, the investment manager will ensure that those investments are made while maintaining the improvement of the ESG profile of the financial product. In addition, those investments are made in compliance with our internal processes, including the following minimum environmental or social safeguards:

- The risk management policy. The risk management policy comprises procedures as are necessary to enable the management company to assess for each financial product it manages the exposure of that product to market, liquidity, sustainability and counterparty risks. And

- The RBC policy, where applicable, through the exclusion of companies involved in controversies due to poor practices related to human and labour rights, environment, and corruption, as well as companies operating in sensitive sectors (tobacco, coal, controversial weapons, asbestos,...), as these companies are deemed to be in violation of international norms, or to cause unacceptable harm to society and/or the environment

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

- The financial product must comply with the RBC Policy by excluding companies involved in controversies due to poor practices related to human and labor rights, environment, and corruption, as well as companies operating in sensitive sectors (tobacco, coal, controversial weapons, asbestos,...), as these companies are deemed to be in violation of international norms, or to cause unacceptable harm to society and/or the environment.

More information on the RBC Policy, and in particular criteria relating to sectoral exclusions, can be found on the website of the investment manager: Sustainability documents - Sustainability documents - BNPP AM Corporate English (https://www.bnpparibas-am.com/sustainability-documents/)

- The financial product must have the weighted average ESG score of its portfolio higher than the weighted average ESG score of its investment universe, as defined in the Prospectus
- The financial product must have at least 90% of its assets (excluding ancillary liquid assets) covered by the ESG analysis based on the ESG internal proprietary methodology.

In addition, the management company has implemented a voting and engagement policy. Several examples of commitments are detailed in the vote and commitment section of the Sustainability Report. These documents are available at the following link: https://www.bnpparibas-am.com/en/documentation-sustainability/

How did this financial product perform compared to the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the financial product.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the relevant market index?

Not applicable
