To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund did not commit to holding sustainable investments with an environmental objective aligned with the EU Taxonomy. However, at the time of writing this report, three companies in which the Sub-Fund is invested have reported EU taxonomy aligned revenues for 2022 (Iberdrola, Orsted, Veolia). Taking into account the weight of these companies in the portfolio, this resulted in a revenue-based investment of 1.0% of total assets

The Investment Manager ensured that these companies did not significantly harm any other sustainable investment objectives by applying its in-house methodology that covers Principal Adverse Impacts, controversies, misalignment with SDGs and ESG/governance quality checks.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?**

☐ YES

☐ In fossil gas

☐ in nuclear energy

☒ NO

"1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214."

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures**
