

ANNEX IV (unaudited)

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Credit Suisse (Lux) Emerging Market Corporate Bond Fund

Legal entity identifier: 529900CW6400BENYNL06

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> Yes	<input type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ____% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 8.33% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ____%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This Subfund promotes environmental, social and governance (ESG) characteristics (within the meaning of Art. 8 of Regulation (EU) 2019/2088).

The Management Company and the Investment Manager applied the Credit Suisse Asset Management (CSAM) Sustainable Investing Policy to this Subfund.

This Subfund promoted the following environmental and social characteristics:

- to invest into companies that comply with international treaties on controversial weapons (norms-based exclusions on direct investments)
- not to invest into companies that derive more than 5% of their revenue from conventional weapons and firearms, tobacco production, gambling, or adult entertainment (values-based exclusions on direct investments)
- not to invest into companies that either derive more than 20% of their revenue from tobacco distribution or conventional weapons support systems and services (values-based exclusions on direct investments)
- not to invest into companies that either derive more than 20% of their revenues from coal (coal mining and coal-based electricity generation), 5% of their revenues in arctic oil and gas, or 10% of their revenues from oil sands (values-based exclusions on direct investments)
- adherence to, and conducting business activities in accordance with, international norms such as the "United Nations Global Compact Principles" (UNGC) (business-conduct exclusions on direct investments)
- higher exposure to investments with positive or neutral Fixed Income ESG signal and limit exposure to investments with negative Fixed Income ESG signal within the defined limits
- contribution to good governance and sustainable practices through engagement with investee companies in line with CSAM's Sustainable Investing Policy (Active Ownership)

The extent to which the environmental and/or social characteristics were met is measured by the sustainability indicators shown below.

Derivatives were not used to attain the environmental or social characteristics.

Please find further information on ESG Integration, ESG Exclusions and Active Ownership below in the question "What actions have been taken to meet the environmental and/or social characteristics during the reference period?" and online at www.credit-suisse.com/esg.

● **How did the sustainability indicators perform?**

The table below shows the output of the Sustainability Indicators applicable to this Subfund as of 30.09.2023. While the sustainability indicators have been monitored continuously during the reference period, the data below does not represent an average for the reference period.

More information about the data sources and applied methodologies for each Sustainability Indicator can be found online at: www.credit-suisse.com/esg.

Sustainability Indicator*	Portfolio	Indicator Output
ESG Rating	AAA: 2.12%, AA: 17.21%, A: 16.68%, BBB: 28.59%, BB: 13.64%, B: 1.85%, CCC: 0.83%, Not ratable**: 2.27%, No data coverage**: 16.83%	Investment exposure by ESG Rating: AAA (highest): 0–100% AA: 0–100% A: 0–100% BBB: 0–100% BB: 0–100% B: 0–100% CCC (lowest): 0–100%
Environmental pillar score	4.95	Portfolio aggregate environmental pillar score: 1 (lowest) – 10 (highest)
Social pillar score	5.31	Portfolio aggregate social pillar score: 1 (lowest) – 10 (highest)
Governance pillar score	4.77	Portfolio aggregate governance pillar score: 1 (lowest) – 10 (highest)
ESG controversy flag	Green: 45.97%, Yellow: 21.77%, Orange: 7.59%, Red: 0.00%, Not ratable**: 6.06%, No data coverage**: 18.62%	Investment exposure by ESG controversy flag: Green: 0–100% Yellow: 0–100% Orange: 0–100% Red: 0–100%
CSAM ESG exclusions**	Pre- and post-trade checks are in place to detect investments that breach the ESG exclusions. Any detected breach is escalated and remedied.	This indicator reflects that the portfolio complied with the applicable ESG exclusions as described in the exclusion section of the website (during the entire reference period, CSAM adhered to ESG exclusion criteria, as stated in the CSAM Sustainable Investing Policy).
Proprietary fixed income ESG signal	Positive: 21.85%, Neutral: 66.35%, Negative: 3.13%, No data coverage**: 3.96%, Not ratable**: 4.71%	Portfolio exposure by proprietary fixed income ESG signal Positive: 0–100% Neutral: 0–100% Negative: 0–100%

* None of the Sustainability Indicators were subject to an assurance provided by an auditor or a review by a third party.

** These categories can show a negative value. This can be caused by negative committed cash positions and the use of certain types of derivatives (such as FX or OTC Collateral) due to trade settlement timing.

*** Note that the amount of investments that were restricted due to the ESG exclusions depend on the investable universe of the Subfund.

● **...and compared to previous periods?**

A comparison of the portfolio's performance of the sustainability indicators compared to previous periods will be available as of the next reference period.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Although this Subfund did not target any minimum proportion of sustainable investment, at the end of the reference period, the sustainable investments contributed to the following Environmental and Social objectives:

- Investments that generated at least 50% of their revenues from products and services that contributed to an environmental objective (e.g. alternative energy, carbon & energy efficiency, green building, sustainable water, pollution prevention, sustainable agriculture etc.)
- Investments that generated at least 50% of their revenues from products and services that contribute to a social objective (e.g. nutrition, disease treatments, sanitation, affordable real estate, SME finance, education, connectivity etc.)
- Investments in securities whose proceeds pursue a predefined environmental or social objective (e.g. green bonds)
- Investments that have an approved commitment to science-based emission targets and an average reduction in carbon emissions intensity of 7% over the last three years
- Investments that cumulatively generated at least 50% of their revenues from products and services that contributed to an environmental or social objective (the investments were allocated to the respective objective that contributed the higher share of revenue)

The above criteria were assessed using a quantitative methodology. If there had not been an output from the quantitative assessment (e.g. in the case of missing quantitative ESG data), investments were submitted for confirmation in a case-by-case approach based on a proprietary assessment of the criteria. A central Credit Suisse Group committee approved such submissions.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

This Subfund did not target any minimum proportion of sustainable investments. CSAM considered various indicators linked to principal adverse impacts on sustainability factors (PAI Indicators) and further indicators from its exclusion framework to assess whether sustainable investments caused significant harm to any environmental or social investment objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

During the reference period, the PAI Indicators applied by CSAM to identify investments which qualify as SFDR Sustainable Investments in line with CS SFDR Sustainable Investment Methodology included a set of criteria and thresholds to determine if an investment passed the DNSH condition as follows:

Investments must not:

1. have a significant negative contribution to climate change. This criterion makes use of an indicator that flags the biggest emitters of greenhouse gas globally and relates to PAI 1, 2, 3 and 15.
2. be subject to norms, values and business conduct exclusions and other investment restrictions which address PAI 4, 10, 14 and 16.

3. be subject to severe ESG controversies which address PAI 7 and 10 where applicable.
4. be strongly lagging its industry peers in overall ESG performance. This criterion has been applied to cover the remainder of the PAI to the extent possible.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Sustainable Investments were aligned with the 'OECD Guidelines for Multinational Enterprises' and the 'UN Guiding Principles on Business and Human Rights'. The alignment was assessed through the CS business conduct framework as part of the CS ESG Exclusion framework. Companies that exhibit severe weaknesses in business conduct, particularly with regard to breaches of the 'United Nations Global Compact Principles' (UNGC) and companies placed on the watchlist, but with no immediate exclusion, were flagged not to be considered SFDR Sustainable Investments due to DNSH.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The following table provides the exposure to all mandatory PAI from the Commission Delegated Regulation (EU) 2022/1288. The Adverse Sustainability Indicator/Metric values are calculated as an average based on quarterly data representing the reference period from 01.10.2022 – 30.09.2023.

Please note that CSAM may choose or may not be able to consider and/or mitigate all of the herein reported PAI given the Subfund's investment strategy, asset class or the availability of reliable data. Consideration of PAI may be subject to change given evolving data availability and quality. Please refer to the EET for the most recent overview of which PAI are considered at Subfund level.

Please find further information on CSAM PAI Framework online at www.credit-suisse.com/esg.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which were neither aligned with the environmental or social characteristics, nor qualified as sustainable investments.

Please refer to the section "What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?" for further information.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that did not qualify as sustainable investments.

The proportion of investments used to meet the environmental or social characteristics promoted by this Subfund (category #1 above) was 91.67% of its total net assets.

Within this category the Subfund held a proportion of 8.33% of its total net assets in sustainable investments (category #1A above) and a proportion of 83.34% of its total net assets in other E/S characteristics (category #1B above).

The proportion of investments held by the Subfund in "Other" (category #2 above) was 8.33% of its total net assets.

The data is valid as of 30.09.2023. It does not represent an average for the reference period.

In which economic sectors were the investments made?

Subfund Sectoral Exposure

NACE Sector Code *	Portfolio Exposure **
A. Agriculture, forestry and fishing	0.54%
B. Mining and quarrying	14.81%
C. Manufacturing	8.50%
D. Electricity, gas, steam and air conditioning supply	3.66%
F. Construction	0.23%
G. Wholesale and retail trade; repair of motor vehicles and motorcycles	1.10%
H. Transportation and storage	1.74%
J. Information and communication	7.76%
K. Financial and insurance activities	50.89%
L. Real estate activities	0.25%
M. Professional, scientific and technical activities	1.04%
N. Administrative and support service activities	0.78%
O. Public administration and defense; compulsory social security	3.80%

Q. Human health and social work activities	0.71%
Others	4.20%

* Please note that the NACE sector allocation is not used in the Subfund's investment strategy. It is provided for disclosure purposes only. For example, the Subfund's investment strategy makes use of company's revenue exposure in accordance with CSAM's ESG Exclusion framework and does not exclude companies based on their NACE sector allocation.

** Portfolio Exposure as of 30.09.2023. It does not represent an average for the reference period. The "Others" category can show a negative value. This can be caused by negative committed cash positions and the use of certain types of derivatives (such as FX or OTC Collateral) due to trade settlement timing.

Subfund Exposure to Fossil Fuels Sub-Sectors

NACE Sector Code *	NACE name	Portfolio Exposure **
B5.1.0	Mining of hard coal	0.00%
B5.2.0	Mining of lignite	0.00%
B6.1.0	Extraction of crude petroleum	9.61%
B6.2.0	Extraction of natural gas	0.42%
B9.1.0	Support activities for petroleum and natural gas extraction	0.00%
C19.2.0	Manufacture of refined petroleum products	3.69%
D35.2.1	Manufacture of gas	0.00%
D35.2.2	Distribution of gaseous fuels through mains	1.01%
D35.2.3	Trade of gas through mains	0.00%
G46.7.1	Wholesale of solid, liquid and gaseous fuels and related products	0.02%

* Please note that the NACE sector allocation is not used in the Subfund's investment strategy. It is provided for disclosure purposes only. For example, the Subfund's investment strategy makes use of company's revenue exposure in accordance with CSAM's ESG Exclusion framework and does not exclude companies based on their NACE sector allocation.

** Portfolio Exposure as of 30.09.2023. It does not represent an average for the reference period.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contri-

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

As of 30.09.2023, the Subfund reports 0.00% exposure to sustainable investments with an environmental objective aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐

Yes

☐

In fossil gas

☐

In nuclear energy

☒

No

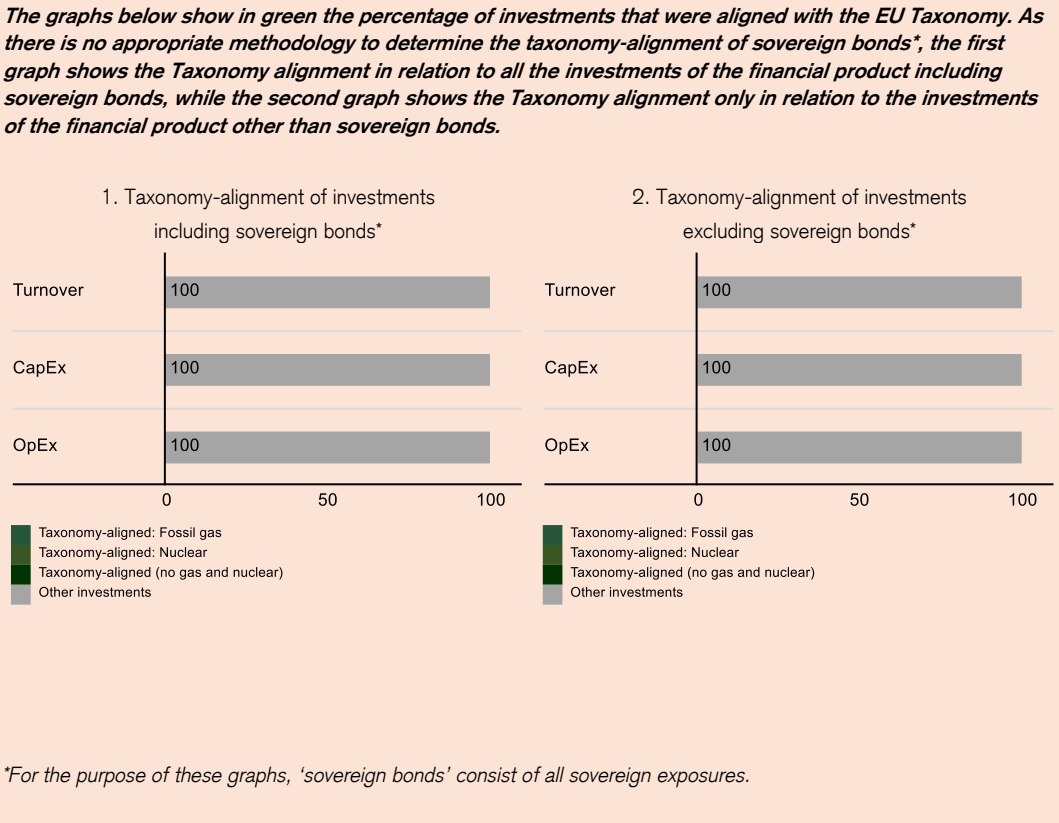

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

tribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The Subfund's reported EU Taxonomy alignment was not subject to assurance or review by a third party.

● **What was the share of investments made in transitional and enabling activities?**

Of the 0.00% of sustainable investments with an environmental objective aligned with the EU Taxonomy as of 30.09.2023, 0.00% were made in transitional activities and 0.00% in enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

A comparison of the portfolio's investments that were aligned with the EU Taxonomy compared to previous periods will be available as of the next reference period.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

As of 30.09.2023, 7.80% of the Subfund's investments were made into sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

As of 30.09.2023, 0.53% of the Subfund's investments were made into socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

As of 30.09.2023, 8.33% of the Subfund's investments were made into "other".

Investments such as cash, derivatives and structured products may have fallen under "other" since such instruments did not contribute to the E/S characteristics of this Subfund. More information about the portfolio exposure to such investments can be found in the financial section of this annual report. Such investments did not have minimum environmental or social safeguards. They may have been used as efficient portfolio management tools, for cash management, for hedging purposes, or as an additional source of return.

Additionally, investments may have fallen under "other" if insufficient ESG-related information was available. This applied in particular to asset classes for which ESG Factors were insufficiently defined or insufficient ESG related information was available. Where possible, minimum environmental or social safeguards have been applied to these underlying securities by ensuring that CSAM ESG exclusions were adhered to.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

To attain the environmental or social characteristics promoted by this Subfund, this Subfund applied ESG Exclusions, ESG Integration and Active Ownership.

This Subfund excluded investments in companies of the following three categories:

- Norms-based Exclusions

This Subfund excluded companies that failed to comply with international treaties on controversial weapons such as the Convention on Cluster Munitions, the Chemical Weapons Convention, the Biological Weapons Convention, the Treaty on the Non-Proliferation of Nuclear Weapons (NPT). In addition, it excluded companies that are recommended for exclusions by the Swiss Association for Responsible Investments (SVVK-ASIR) in respect to APM (anti-personnel mines), cluster munitions and nuclear weapons (outside of NPT).

- Values-based Exclusions

This Subfund excluded companies that derived more than 5% of their revenue from conventional weapons and firearms, tobacco production, gambling, or adult entertainment. It excluded companies that derived more than 20% of their revenue from tobacco distribution and conventional weapons support systems and services. In addition, a revenue limit of 20% applied to investments in coal (coal mining and coal-based electricity generation).

- Business-conduct Exclusions

Companies found to systematically violate international norms, where the breaches were particularly severe, or where management was not open to implement necessary reforms, were placed on a watch list, and may have been excluded from the Credit Suisse-wide investment universe. This process was governed by a dedicated committee that maintained

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

the list of excluded companies and was responsible for ensuring that the list is communicated to investment teams in a timely manner.

ESG Factors were integrated into the investment process in the following four main steps:

- Identification of material ESG Factors

Investment managers used 3rd party materiality frameworks to identify relevant ESG Factors for the Subfund. Materiality frameworks are concepts that help to identify sustainability-related issues and opportunities that are likely to affect the financial condition or operating performance of potential investee companies within an industry.

- ESG security analysis

Investment managers performed security analysis based on the identified material ESG Factors. To integrate ESG Factors into the security analysis, investment managers calculated an ESG-adjusted credit view for the issuers in the fund's investment universe by applying a proprietary methodology to systematically combine the issuer's traditional credit rating with its ESG rating to derive an ESG-adjusted credit rating. The ESG-adjusted credit rating enabled investment managers to compare securities on an ESG-adjusted basis and to evaluate whether to add or keep certain securities in the portfolio during the security selection and portfolio implementation stage. ESG-adjusted credit ratings were updated as soon as an update of the underlying traditional credit rating or ESG rating became available.

- Security selection and portfolio implementation

The ESG-adjusted credit ratings were used by investment managers in the bottom-up security selection process. The position weights were derived from over or underweighting as well as excluding securities based on the ESG-adjusted credit ratings. In this step, investment managers combined ESG-adjusted credit ratings with established tools of traditional investing strategies to make better informed investment decisions.

- Portfolio monitoring

Investment managers monitored the ESG Factors daily to detect significant changes in the ESG Factors of underlying securities and regularly reassessed the portfolio to decide whether to increase or decrease positions in the portfolio.

- Engagement

CSAM engaged with investee companies with the aim of increasing its impact on sustainability issues. Selected companies that were able and willing to take action were subject to engagement and CSAM sought to preserve and/or enhance the value of the companies they invested in, through engagement with issuers. The Active Ownership team defined the topics and issues CSAM wanted to discuss with investee companies. The resulting engagement activities for the reference period of this SFDR annex to the annual report were defined using certain criteria and aimed at companies in which CSAM held considerable investments through its funds. More information about the engagement activities and the most current active ownership report of CSAM can be found online at: www.credit-suisse.com/esg.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

The Subfund did not use a reference benchmark for the purpose of attaining the environmental and/or social characteristics.

● *How does the reference benchmark differ from a broad market index?*

Not applicable.

● *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*
