

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Template pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global Franchise Fund

Legal entity identifier: 213800ENHEQTIA6IRV12

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes
 No

<input type="checkbox"/> It will make a minimum of sustainable investments with an environmental objective: _____% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It will make a minimum of sustainable investments with a social objective: __%	<input type="checkbox"/> It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promotes E/S characteristics, but will not make any sustainable investments
--	---

What environmental and/or social characteristics are promoted by this financial product?

The Sub-Fund promotes better carbon outcomes (i.e., maintaining a carbon profile lower than the Sub-Fund's benchmark) by making investments in companies that meet the standards of the Investment Manager's proprietary sustainability assessments and by excluding investments in certain sectors or business areas (deemed incompatible with a net zero future).

Details of the proprietary sustainability assessment and information on exclusions are explained in the question below on 'what investment strategy does the financial product follow?'

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The Investment Manager seeks to maintain a carbon profile lower than the Sub-Fund's benchmark.

On at least an annual basis, the following sustainability indicators will be used to measure the attainment of the environmental or social characteristics promoted by the Sub-Fund:

- the carbon profile of the Sub-Fund; and
- the carbon profile of the benchmark.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Currently, the carbon profile of the Sub-Fund is derived by taking the sum of the annual 'financed emissions' based on the percentage held by the Sub-Fund of each assessable investment's enterprise value. This is normalised by dividing by the total amount of dollars invested by the Sub-Fund in the investments to give a comparable footprint.

The Sub-Fund's promotion of better carbon outcomes is intended at the aggregate Sub-Fund level. This means not every investment held will have lower carbon emissions than that of the Sub-Fund's benchmark at any single time.

- **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

N/A

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

N/A

- *How have the indicators for adverse impacts on sustainability factors been taken into account?*

N/A

- *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

N/A

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Does this financial product consider principal adverse impacts on sustainability factors?

- Yes, as part of the in-depth fundamental analysis of an individual company, the following principal adverse impact indicators are currently considered for the Sub-Fund's investments:

- GHG emissions
- Carbon footprint
- GHG intensity of investee companies

In addition, as described in the section on the investment strategy followed below, the Sub-Fund does not invest in certain companies in relation to the following principal adverse impacts:

- Exposure to companies active in the fossil fuel sector
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons)

An assessment of the principal adverse impacts at the aggregate Sub-Fund level will be reported on an annual basis in the annual report as required by Article 11 SFDR.

No

What investment strategy does this financial product follow?

Sustainability Framework

As part of the fundamental analysis stage of the investment process, the Investment Manager assesses the investee companies using the pillars listed below to determine whether they meet the standards required by the Investment Manager. This analysis uses a variety of qualitative information and available data. There will be no mechanistic reliance on external ESG ratings and scores.

Sustainability is fully integrated into the analysis of every company and is assessed according to the following three pillars:

1. **Business model sustainability**

This may include, for example, (i) sustainability of relationships with suppliers, customers, and employees; (ii) relationships with regulators, the threat from increasing regulatory scrutiny; (iii) sustainability of environmental practices, raw material sourcing, energy efficiency, water usage, carbon footprint; (iv) products and services' impact on society and the environment; and (v) climate resilience of investee companies (including their commitments to achieve net zero targets).

2. **Financial model sustainability**

This may include, for example, (i) quality of accounting policies; (ii) sustainability of capital structure and working capital cycle; and (iii) cash flow sustainability and tax rate.

3. **Sustainability of capital allocation and corporate governance**

This may include, for example, (i) alignment of business and capital allocation with long-term shareholders and other stakeholders, including employee relationships; (ii) appropriate executive compensation aligned with long-term value creation; and (iii) assessment of traditional governance issues such as risk management, board balance, independence of key committees (such as audit and remuneration), related party transactions, executive track records, and turnover.

Exclusions

In addition, the Sub-Fund avoids sectors that are deemed incompatible with a net zero future. As a result, the Sub-Fund will not invest in companies that are directly involved in the following business activities:

- thermal coal extraction or power generation; or
- production and generation of fossil fuels.

Furthermore, the Sub-Fund will not invest in companies that:

- are directly involved in the manufacture and production of controversial weapons (including biological and chemical weapons, cluster munitions, and landmines); or
- are directly involved in the manufacture and production of nuclear weapons; or
- the Investment Manager deems to be in violation of global norms, in particular the UN's Global Compact principles.

Over time, the Investment Manager may, at its discretion and in accordance with this investment policy, elect to apply additional exclusions to be disclosed on the website as they are implemented and subsequently updated in this Prospectus at the next available opportunity.

Additional Considerations

As part of its strategy, the Investment Manager will also engage with company management regarding climate focuses on disclosure of carbon data and encourage the adoption of transition pathways towards net zero, where it identifies opportunities to effect positive change or to deepen knowledge and insight, with respect to sustainability considerations.

The Sub-Fund's holdings will be monitored on an ongoing basis by the Investment Manager. A holding may be sold for a range of reasons but in particular, if it is determined that the investment case for the holding has been weakened or it no longer satisfies the investment objective and policy of the Sub-Fund. Such sales will take place over a time period to be determined by the Investment Manager, taking into account the best interests of the Shareholders of the Sub-Fund.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

- **What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?**

The Investment Manager applies its sustainability analysis consistently and on an ongoing basis to assess the environmental and social characteristics of the Sub-Fund's investments.

In the securities selection process, the Investment Manager applies in a binding manner the promoted environmental characteristics of better carbon outcomes, as described above, in the portfolio of the Sub-Fund.

This criterion does not apply to the Sub-Fund's '#2 Other' investments – please find more detail in the question about asset allocation planned below.

In addition, the Sub-Fund will not invest in certain sectors or investments, as described above.

- **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

N/A

- **What is the policy to assess good governance practices of the investee companies?**

The Investment Manager follows an internal investment framework to analyse any governance issues related to investee companies. This is rooted in widely accepted governance principles and guidelines which are outlined in the Investment Manager's Ownership policy on its website. The following corporate governance themes are core to Ninety One's policy in relation to managing governance related issues and determining good governance:

- Leadership and Strategic Control, including board diversity, independence and engagement;
- alignment with the long term, including remuneration and governance of sustainability issues;
- climate change, including adequacy of management and disclosure of risks;
- protecting capital through capital management and preserving shareholder rights; and
- audit and disclosure, including financial reporting quality and auditor competence.

Third party data complements the governance assessment.

For the Sub-Fund, assessing the good governance practices of companies is part of the in-depth fundamental analysis that the Investment Manager performs on investee companies and through the ongoing monitoring of holdings. The Investment manager considers, amongst other elements, sound management structures, employee relations, remuneration of staff, and tax compliance.

Where a governance issue is identified, the Investment Manager may engage directly with company management on this issue and /or exercise proxy voting rights in an effort to catalyse change.

Good governance practices include sound management structures, employee relations, remunerations of staff and tax compliance.

Asset allocation describes the share of investments in specific assets.

What is the asset allocation planned for this financial product?

The minimum proportion of investments used to meet the environmental or social characteristics promoted by the Sub-Fund (i.e., '#1 Aligned with E/S characteristics') is 66% of its assets.

Information on the purpose of the remaining investments and any minimum environmental or social safeguards applied is outlined in the section below on 'What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?'

The investments included in '#1 Aligned with E/S characteristics' are selected in accordance with the binding criteria outlined in the section 'what investment strategy does this financial product follow?' under the sub-section entitled, 'Sustainability Framework' and 'Exclusions'.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

- **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

N/A

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not currently commit to invest in any sustainable investment within the meaning of Article 2(17) SFDR or the EU Taxonomy Regulation, accordingly the minimum share of EU Taxonomy-aligned investments is 0% of the Sub-Fund's assets.

- **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy³⁰?**

Yes:

in fossil gas in nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

³⁰ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What is the minimum share of investments in transitional and enabling activities?**

The Sub-Fund does not currently commit to invest in any sustainable investment within the meaning of Article 2(17) SFDR or the EU Taxonomy Regulation, accordingly the minimum share of investments in transitional and enabling activities is 0% of the Sub-Fund's assets.

are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under the EU Taxonomy.

● **What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?**

The Sub-Fund does not currently commit to invest in any sustainable investment within the meaning of Article 2(17) SFDR or the EU Taxonomy Regulation, accordingly the minimum share of sustainable investment with an environmental objective that is not aligned with the EU Taxonomy is 0% of the Sub-Fund's assets.

● **What is the minimum share of socially sustainable investments?**

N/A

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

‘#2 Other’ includes investments, as described in the Sub-Fund’s investment policy, that support the financial objective and other management activities of the Sub-Fund such as:

- equities that are considered not aligned with E/S characteristics;
- derivatives for hedging, and/or Efficient Portfolio Management;
- Cash held for liquidity purposes as an ancillary asset, deposits, and money market instruments; and
- shares or units in other funds and exchange traded funds in which the Investment Manager does not have direct control of the underlying investments.

No minimum environmental or social safeguards are applied. Such investments will not usually represent a material proportion of the Sub-Fund’s portfolio.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

N/A

Reference benchmarks

are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

N/A

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

N/A

- ***How does the designated index differ from a relevant broad market index?***

N/A

- ***Where can the methodology used for the calculation of the designated index be found?***

N/A

Where can I find more product specific information online?
